PROFILE

Motivated software development student with experience in building web applications and static sites using HTML, CSS, Python, Django and MySQL.. Skilled in frontend design, backend integration, and database connectivity. Passionate about clean code, Problem-solving, seeking an internship or entry-level developer role.

Projects

Shoe Store Website

- A responsive e-commerce site inspired by Adidas/Nike using HTML, CSS, JavaScript, PHP, and MySQL. Designed for smooth navigation, product display, and a modern shopping experience.

College Management System (Full-Stack)

- A comprehensive web app built with Streamlit, Python, SQLAlchemy, and MySQL/SQLite. Implemented role-based authentication, class scheduling, email notifications, and an analytics dashboard. Designed with a responsive UI, dark/light mode, and scalable database structure to handle multiple users efficiently.

Computer Store Web App

- An e-commerce platform for computer accessories built with Flask, MySQL, HTML, and CSS. Implemented product listings, cart functionality, and database integration to manage inventory and customer orders efficiently.
